INTERNATIONAL ENVIROGUARD SYSTEMS, INC., OFFERS PROTECTIVE GARMENTS FOR EBOLA PROTECTION

INCREASED DEMAND FOR EBOLA PROTECTIVE SUITS LEADS TO EXPANDED MANUFACTURING OUTPUT AND INVENTORY AVAILABILITY

MESQUITE, TX September 18, 2014: International Enviroguard, a leading provider of protective clothing, announced the increased availability of protective garments for protection of healthcare workers involved with dealing with patients infected with the Ebola Virus. These garments include the brand names ViroGuard® and CSP1® and offer impermeable sealed seams for the ultimate protection against this deadly virus. Please note: Fabrics and seams are tested using recognized procedures to determine the level of barrier against proxy materials for blood-borne pathogens. They are not tested against specific viruses, such as Ebola.

International Enviroguard is working with several leading companies and government agencies on providing the correct suits required. These garments have been tested to EN14126, the European standard for protection against infective agents and ASTM 1670/ASTM 1671 tests for blood and blood-borne pathogen hold out. For additional information or to inquire about inventory please visit www.int-enviroguard.com or contact customer service.

DISCLAIMER: This information is based upon technical data that International Enviroguard believes to be reliable. It is subject to revision as additional knowledge and experience are gained. International Enviroguard makes no guarantee of results and assumes no obligation or liability in connection with this information. It is the user's responsibility to determine the nature and level of hazard and the proper personal protective equipment needed. The information set forth herein and on all publications reflects laboratory performance of fabrics, not complete garments, under controlled conditions. It is intended for informational use by persons having technical skill for evaluation under their specific end-use conditions, at their own discretion and risk. Anyone intending to use this information should first verify that the garment selected is suitable for the intended use. In many cases, seams and closures have lower barrier performance than the fabric. Viroguard® and Chemsplash® 1 garments are intended for limited use and can be worn until damaged, altered or contaminated. These garments should not be laundered for reuse in protective apparel or cleanroom applications. Damaged, altered or contaminated garments should be disposed of in an appropriate manner. SINCE CONDITIONS OF USE ARE OUTSIDE OUR CONTROL, WE MAKE NO WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE, AND ASSUME NO LIABILITY WHATSOEVER IN CONNECTION WITH ANY USE OF THIS INFORMATION. This information is not intended as a license to operate under, or a recommendation to infringe upon, any trademark, patent or technical information of International Enviroguard or others covering any material or its use.
